

★ Remember to have your calculator in degree mode!!!

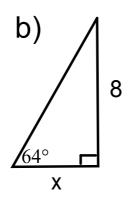

Ex. 1 Solve for x to one decimal place.

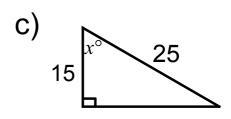

a) 
$$\cos 35^{\circ} = \frac{x}{14}$$

b) 
$$\tan x^{\circ} = \frac{11}{3}$$

Ex. 2 Find x.

Ex. 3 How high up the side of a house does a 6 foot ladder go when the base of the ladder has an angle of elevation of 35°?

Ex. 4 You are standing 15 m from the base of Castle Kilbride. The angle of elevation to the top of the castle is 32°. How tall is Castle Kilbride to the nearest metre?
